## ON CAMPUS PRAYER

*LET'S TAKE BACK THE CAMPUS FOR JESUS!*

Every Thursday from 1-2pm our staff and students gather to lift up our campus, the students, and the faculty. It is such a powerful time! Also, we have just seen God move from it. We have been seeking God to continue to open the campus more for us. We specifically want to be able to have our services on Campus again and more events that can help us reach more students. Although we cannot have service there yet, we have finally been approved for multiple events and outreaches!

## LOVE, DATING, & RELATIONSHIPS (LDR)

I'm sure it's no surprise we talked about L.D.R during valentine's day to a room full of college students! This time was so intentional and also just fruitful. We had a married couple preach on LDR during our weekly large group service. Then on the following Sat. we split into guys and girls and did a questions and answers night. One of my girls specifically never fully understood the significance of marriage, or the point. Yet, since this night, she has just been able to understand the beauty and reason behind it. I was able to encourage her to read "Meaning of Marriage" and I am just excited she is able to gain a biblical understanding of it. Now, she believes it is something that is important.

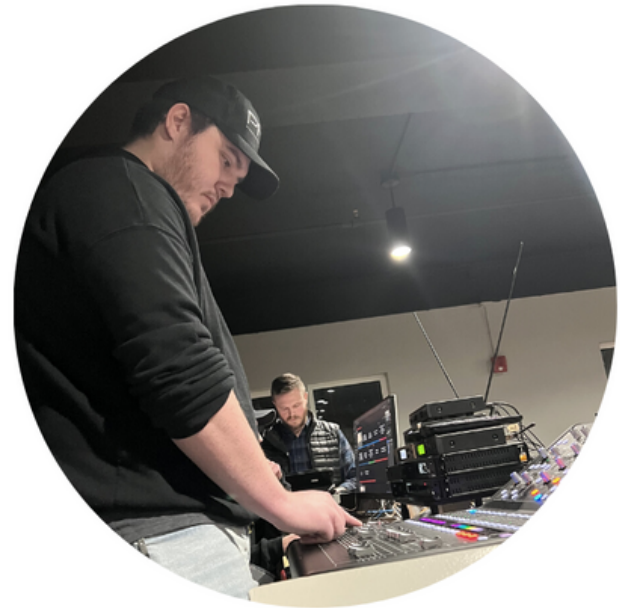

## MISSIONS TRAINING

In XA we have a saying in regards to missions: **Every student goes. Every student gives. Every student prays.** We truly want missions to be ingrained within the culture of what we do. So every year we send out students internationally and locally! This year we have three trips going out to Kenya, Southeast Asia, and a village camp in lower Alaska called Camp Hope! Praise God, right? In some way or form we have connections with missionaries in all of these places, and are going to serve them and the people they minister too. In Feb we had a two day training for our students where we taught on logistics and spiritual vitality (I was able to speak on Why Missions). We also just spent a lot of time in prayer and worship together.

# Tylers New Internship Responsibilities

Going into the spring semester, the interns have been given specific roles and responsibilities that they now head over. Tyler has been asked to head up all campus outreach and has been learning how to run sound and tech stuff for services. He has gotten our community more on campus at sporting events, and also is putting together an Easter outreach and one for finals week! It has been awesome!

## Prayer updates from last month

Last month I put out 3 urgent prayer requests. Not a lot has changed for two of the students. However, the student that was homeless now has a job, and is able to get an apt! She also was able to pay off her school bill, and so she will be able to return to UAF for summer semester. Thank you for continuing to keep these students in your prayers, we are believing great things for them!

## PRAYER REQUEST

We have one month left of spring semester, and we have the opportunity to have two outreaches on campus. We are just asking for prayer that the campus would 1. allow them and 2. that God would just move and we would meet more students.
